Maximum Marks	4 Marks

### Step 1: Problem Statement Selected

How can we build a unified, accessible online learning platform where students can discover, enroll, and complete courses at their own pace — while enabling teachers to easily publish content and admins to manage the platform effectively?

### Step 2: Ideas Generated

Student Ideas	Teacher Ideas	Admin Ideas
Search/filter courses by name, category	Simple course & section creation form	Centralized dashboard for all users
Resume course from last checkpoint	Delete course (if no enrolled students)	Edit or remove any course on the platform
Paid & free course access via purchase flow	Track enrolled student count per course	View all enrolled students per course
Download certificate on course completion	Set course price and category	Monitor platform activity in real time
Enroll in multiple courses simultaneously	Upload course description and sections	Manage all user types (student/teacher)

### Step 3: Idea Prioritization (Impact vs. Effort)

Idea	Impact	Effort	Priority
User registration & role-based login	High	Medium	P1
Course listing with search & filter	High	Medium	P1
Course enrollment (free & paid)	High	Medium	P1
Teacher course & section management	High	Medium	P1

Admin full platform control	High	Low	P1
